PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 2 years of experience driving backend system development using JavaScript (MERN) and Python. Proven expertise in designing and implementing scalable APIs and databases, with a strong proficiency in Git/GitHub version control. With a unique blend of technical skills and language proficiency in English, Japanese, and native Kinyarwanda, I excel in diverse environments and deliver high-quality solutions. I leverage my adaptability, strong work ethic, and problem-solving abilities to drive project success.

EDUCATION

Associate's in Civil Engineering

Apr 2020 - Mar 2023

National Institute of Technology Nagaoka College, Nagaoka, Japan

SKILLS

Technical Skills

Python Programming • Data analysis • Full-stack web development • Algorithm Design • Javascript • React • Node.js • PHP • Laravel • AWS

Soft Skills

Problem-solving • Analytical thinking • Communication • Adaptability

PROJECTS

Agakayi Notes App

[Link](#)

React, Node.js, Express.js, MongoDB, JWT Authentication

- Developed a full-stack notes app using React, Node.js, Express.js, and MongoDB. Built RESTful APIs.
- Implemented JWT authentication for secure user access and protected routes.
- Designed responsive user interfaces with efficient CRUD functionality for managing notes.
- Focused on backend logic, API integration, and scalable application structure.

Rshift-extraction-chrome-extension

[Link](#)

Javascript, DOM manipulation, Google Calendar API, OAuth authentication

Rshift-extraction-chrome-extension

- Developed a browser-based automation tool using JavaScript and DOM manipulation to extract shift schedules from web pages, streamlining manual scheduling processes
- Designed and implemented a Chrome extension with a manifest configuration to inject scripts and detect structured shift data, including dates and working hours
- Integrated Google Calendar API with OAuth authentication to enable seamless transformation of extracted shifts into calendar events and one-click export of full schedules
- Leveraged the Google Calendar API integration to automate shift detection and calendar synchronization, resulting in enhanced time management efficiency
- Utilized JavaScript and DOM manipulation to create a robust and efficient shift extraction system, automating a previously manual process and increasing productivity

LANGUAGES

English (Fluent) • Japanese (Fluent) • Kinyarwanda (Native) • French (Intermediate)
